The Sands' Torquay

Get the best of both worlds, whether you want to enclose your patio during the winter or just stop the wind blowing in summer. In just a few minutes you can enclose or open your outside area to suit your needs

When in use PVC Blinds actually add another room onto your house especially when used in conjunction with an outdoor heater for winter warmth. When not in use the blinds can be rolled-up until needed again.

Gearbox Operation

Link Panels With Velcro Attachment

Stainless Steel Fittings

Clear or Tinted PVC Retractable Blinds are a perfect way to maximise the use of your Pergola, Veranda or Balcony while still maintaining your view. Clear blinds are perfect in preventing discomfort from wind and rain that can be a problem all year round.

Clear and Tinted blinds are manufactured from UV stabilised PVC. The blinds are operated using a Gearbox and Crank Handle. In some cases these blinds can be motorised with a wall switch or remote control operation
