

Docril

100% SOLUTION DYED ACRYLIC FABRIC

CANVAS FABRIC SPECIFICATIONS

DECEMBER 2004

INFORMATION:

CARE INSTRUCTIONS

When used in permanent outdoor situations Docril should be hosed regularly to remove dust, bird droppings and other solid particles.

Water based stains should be treated first by rinsing in cold water. If this is not sufficient, Docril may be washed with a mild solution of soap in lukewarm water and rinsed thoroughly.

Stubborn soiling may require treatment with a hypochlorite bleach which can be found in your local supermarket. The fabric should be washed with a solution of one part bleach in four parts of warm water. Apply the diluted solution to the fabric with a soft brush and rinse off thoroughly after 15 minutes. Follow the safety directions outlined on the bleach container.

It is important to ensure that your Docril awning or blind is not rolled up when wet. Outdoor furniture and cushions should also be dried out.

5 Year Guarantee:

If your Docril fabric becomes unserviceable due to UV degradation, mildew or rot, Citel's 5 year guarantee will apply.

Citel's 5 year guarantee on Docril covers fabric (free of charge) required for the installer/manufacturer to replace the awning.

Manufacture/installation is not included. This guarantee can only be enforced against presentation of the original installers invoice showing fabric reference and colour as well as date of assembly. The correct care procedures (as outlined above) must be followed to ensure that every step has been taken to maintain your Docril fabric.
