

Tempotest

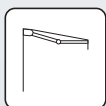

Tempotest is a stylish 100% acrylic fibre, solution dyed fabric from Europe. Available in two versatile widths 120cm & 250cm*, this acrylic collection has DuPont Teflon fabric protection with Nanotechnology, making Tempotest stronger and more durable than ever before. This makes Tempotest suitable for environments that are dry and dusty to an environment that is high in humidity and rainfall.

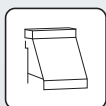

Tempotest acrylic has been designed for use on folding arm awnings as well as conventional exterior blinds, boat covers and umbrellas. Now also available in 250cm* width it has more flexibility for uses in traditional awnings, straight drop blinds and alfresco blinds. Manufactured in Europe by Para, this fabric delivers a quality that is more suitable for our Australian climate.
