

Bistro/Cafe Blinds with Zips

by Coolabah Shades

Bistro Café Blinds with Zips are an ideal entry level solution to enclose your outside pergola or Alfresco area.

Fixed along the top and down the sides using an Annex track, they are available as a hand roll operation or open up using a rope and pulley system. The Annex tracks create a gap-free seal around and hold the blinds firm in strong winds. A weather flap across the bottom reduces draughts and stops the rain from coming in under the blind.

Bistro blinds with Zips– Hand roll

The simplest form of the blinds, with the Hand roll operation, simply unzip the blind on both sides and roll the blind up using the bottom rail, once rolled up, use the supplied straps to secure in the open position.

To close the blinds, unclip the straps and unroll the blind, once down, close the zippers down the sides.

The benefit of the hand roll system is that it is a very minimalist solution, no rope and pulleys hanging around.

Hand roll blinds are not generally used in areas with large drops to avoid the need to climb a step ladder.

Key Features– Both styles

- Easily installed to existing pergola or Alfresco areas
- Economical
- Weather Flap across the bottom to prevent rain driving in under the blind
- Blind is firmly fixed down the sides
- Choice of PVC or Shadmesh fabrics

Unique Features– Hand roll

- Clean Minimalist look
- Top straps can be removed for even cleaner look

Unique Features– Rope & Pulley

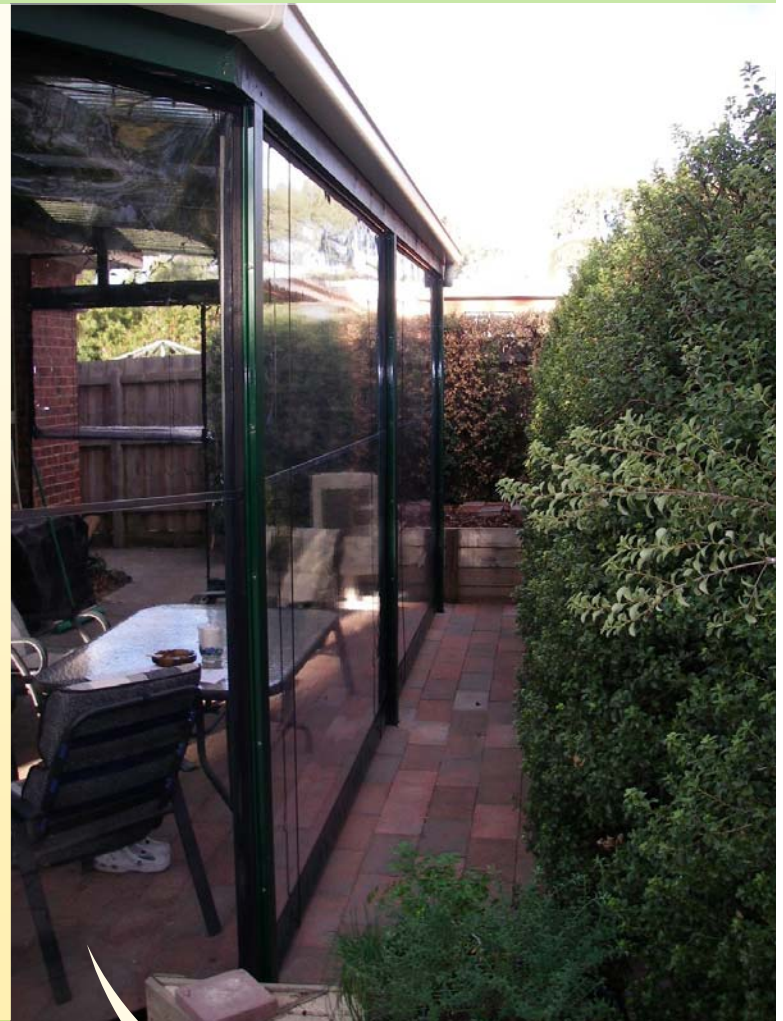

- Ideal for large drops
- Open blind to various heights

Bistro Blinds with Zips - Rope & Pulley operation

The benefit of the Rope & Pulley system is that it offers the ability to open the blinds to various heights. By unzipping the blind to an intermediate position, the blind can be rolled up using the rope and pulley to that position and tied off on the rope cleat, the blind will stay in that position, ideal if needing to leave a small opening for the dog to come and go.

The rope and pulleys are also popular when the blind height is too high to use the hand roll option. Allowing for easy operation from ground level.
