LUMERA

Cleaning
& Care

Explanation
of symbols

The characteristic feature of our **LUMERA quality** line is the **smooth surface** created by combining staple fiber in the warp and brilliant acrylic yarn CBA (Clean Brilliant Acrylic) in the weft. The use of these fibers results in a **smoother and denser** fabric structure. Colors shine even more and the fabric's self-cleaning effect improves ensuring its durability.

CBA

LUMERA ALL WEATHER

All advantages offered by **LUMERA** are combined in **LUMERA ALL WEATHER** with an even more functional protection for almost all weather conditions from sun to rain. A wafer-thin finish with the intelligent **IPC** coating makes the fabric **waterproof** and yet maintains the suppleness of the fabric.

Keep an eye out for this symbol:
